Determining Adequate Overhang

To determine if your door has adequate overhang, measure up from the bottom of the door to the ceiling and divide that distance by two. The resulting number will be the minimum allowable overhang. If you have a western or southern exposure, you may still receive direct sunlight on the door and a larger overhang will be required.

CHARACTERISTICS EXCLUDED FROM WARRANTIES

The following are not defects in the workmanship or material and are not covered by this written warranty:

1. Damage caused by failure to comply with the "Care & Finishing" instructions.
2. Warp of less than or equal to 1/4" in the plane of any door 3' x 7' or smaller.
3. Defect caused by a warped or bowed jamb/frame unit or improper installation.
4. Natural variations in the color or texture of the wood.
5. Failure to properly seal the door. All six sides must be sealed immediately after fitting and hanging with the integrity of the finish maintained.
6. Panel misalignment or shrinkage.

8. Damage caused by extreme temperature build-up where a storm door is utilized.
9. Failure to perform normal homeowner's maintenance, including but not limited to, reapplying topcoat on a yearly basis.
