Interfor Elite V-JOINT PANELING

Interfor Elite Cedar V-Joint Paneling offers the ultimate in quality appearance — combining the exceptional beauty and outstanding performance of Western Red Cedar with our consistent manufacturing excellence. As one of the world's largest suppliers of Western Red Cedar, Interfor has a reliable fiber supply to provide the perfect product when it is needed.

NOW AVAILABLE IN SACRAMENTO

Interfor Elite V-JOINT PANELING

Best Choice for Appearance

Western Red Cedar offers beauty, rich color and exceptional building properties, and it is manufactured to exacting standards through our kiln and planer facilities. Properly finished and maintained, Western Red Cedar ages gracefully and lasts for years.

Interfor Elite V-Joint Paneling features straight, even grain; uniform texture, and sound, tight knots that will not fall out over time. It is reversible — smooth on one face and saw-textured on the other — and can be installed with either side exposed. The sawn face adds an appealing texture to the finished project. The product is available in both a V4E and V2E pattern.

Best Choice for Quality and Performance

One of the easiest woods to work, Western Red Cedar is dimensionally stable, lightweight, strong and versatile, and is naturally resistant to decay and insect damage. Interfor Elite V-Joint Paneling is easy to saw and glue, and accepts nails and other fasteners.

The cellular structure and insulation value of Western Red Cedar means that buildings featuring Cedar paneling, ceilings or siding are cooler in the summer and warmer in the winter. The wood also suppresses and absorbs sound.

Tongue and groove is widely used for its appearance and versatility. Interfor Elite V-Joint Paneling can be installed vertically, horizontally or diagonally; each method giving a distinctly different look.

Best Choice for the Environment

Wood from responsible sources is by far the best building choice. Wood grows naturally, it is recyclable and renewable, and its cellular structure captures and stores carbon. Interfor meets the highest environmental standards, and our quality Western Red Cedar comes from forests in British Columbia that are third-party certified.

Western Red Cedar's natural oils that act as preservatives protect against decay and insects so harmful chemical treatment is not needed.

Imperial Size (nominal inches)	Imperial Size (actual inches)	Dressing	Seasoning	Pieces per bundle	Volume per package	Length (feet)
1 x 6	1 ¹ / ₁₆ x 5 ³ / ₈	Smooth Face / Resawn Back	Kiln Dried	6	2,200 fbm	8-16 O&E 8-16 PTL

Finishing and Maintenance:

- Western Red Cedar is pitch and resin-free, making it an excellent base for paints and stains.
- Western Red Cedar should never weather for more than two weeks before finishing. All finishes adhere and perform better when applied to fresh, unweathered wood.
- Power washers are not recommended for use on Western Red Cedar.
- For best results, Western Red Cedar should be coated on all sides before installation. Factory finishing, where available, is preferred.
- Corrosion-resistant nails such as hot-dipped galvanized aluminum and stainless steel are recommended.
- More detailed information is available from the Western Red Cedar Lumber Association website at www.realcedar.com/resources/brochures-literature/.

Interfor is a growth-oriented lumber company with operations in Canada and the United States. The Company has annual production capacity of 3 billion board feet and offers one of the most diverse lines of lumber products to customers around the world.

CEDAR

Interfor Regal AK ARCHITECT KNOTTY DECKING

Interfor Regal AK Architect Knotty Decking offers the ultimate in quality appearance, and is consistently manufactured to exacting standards through our kiln and planer facilities. Renewable and biodegradable, Western Red Cedar has both exceptional beauty and natural preservatives that protect against decay and insects without the need for chemicals. As one of the world's largest suppliers of Western Red Cedar, Interfor has a reliable fiber supply to provide the perfect product when it is needed.

Interfor Regal AK ARCHITECT KNOTTY DECKING

Best Choice for Appearance

Interfor Regal AK Architect Knotty Decking exceeds WRCLA Architect Knotty Standards, and is the product of choice for builders who want to add beauty and prestige to their project – at an affordable price.

Western Red Cedar delivers beauty, rich color and exceptional building properties. Properly finished and maintained, it ages gracefully and lasts for years.

Best Choice for the Environment

Wood from responsible sources is by far the best building choice. Wood grows naturally, it is recyclable and renewable, and its cellular structure captures and stores carbon. Interfor meets the highest environmental standards, and our Western Red Cedar comes from forests in British Columbia that are third-party certified.

Western Red Cedar’s natural preservatives protect against decay and insects so harmful chemical treatment is not needed.

Best Choice for Quality and Performance

One of the easiest woods to work with, Western Red Cedar is dimensionally stable, lightweight, strong and versatile, and is naturally resistant to decay and insect damage. Interfor Regal AK Architect Knotty Decking is easy to saw and glue, and accepts nails and other fasteners.

Interfor Regal AK Architect Knotty Decking features straight, even grain and uniform texture, and meets standards that set it apart from the competition, including:

- All knots are sound and tight. No more than two not firmly fixed knots are allowed per 12 lineal feet, and they must be half of the maximum size allowed.
- The maximum knot size is 2" for 2x4s and 2 7/8" for 2x6s.
- No holes are permitted.
- Wane is strictly limited to one face, and kept to a minimum of one quarter width and thickness on the reverse face only.

Nominal (inches)	Net (inches)	Dressing	Seasoning	Pieces per package	Lengths
2 x 4	1 5/16 x 3 5/16	S4S	Green	208	8 - 20' ELO
2 x 6	1 5/16 x 5 5/16	S4S	Green	128	8 - 20' ELO

Finishing and Maintenance:

- Western Red Cedar is pitch and resin-free, making it an excellent base for paints and stains.
- Western Red Cedar should never weather for more than two weeks before finishing. All finishes adhere and perform better when applied to fresh, unweathered wood.
